CATCH-ALL

INTELLIGENT TRAFFIC
MANAGEMENT
TOWARDS A SMART CITY

INTELLIGENT TRANSPORTATION SYSTEMS FORUM

Prof. Dr. Elmer P. Dadios

Full Professor and University Fellow

Chair – Department of Manufacturing Engineering Management

De La Salle University, Manila, Philippines

Accident

Traffic due to
Accident

Increased Traffic
Volume

CATCH-ALL

Elmer P. Dadios, PhD.

PhD – Loughborough University, UK

Full Professor and University Fellow

De La Salle University, Manila, Philippines

Problem

Heavy traffic is a major impediment, affecting the economy, the environment, and **human life**.

The goal

A Smart City integrating technology in everyday activities to improve **quality of life**.

Our vision

The use of information technology in traffic management towards a **Smart City**.

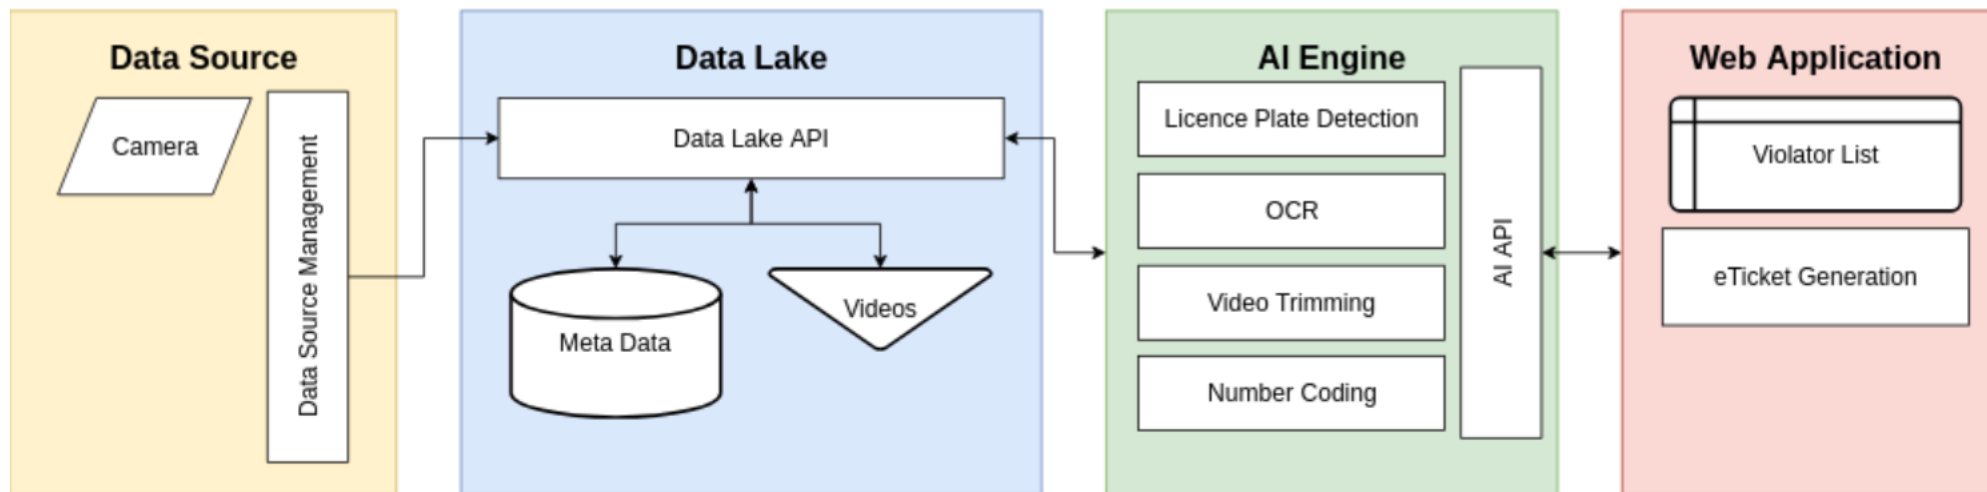

The Solution

CATCH-ALL is a traffic management and analytics system based on computer vision and artificial intelligence.

The System

Data Pipeline

MARKET OPPORTUNITY

COMPETITION

RISKS

Big companies that engages in traffic management and infrastructure solutions.

ADVANTAGES

Products and services offered by competitors do not have traffic violations detection applicable for Philippine license plate recognition.

24/7 Local Support Service and Less Costly

Invented for life

Bosch in the Philippines

Products and services

Mobility

Bosch brings together comprehensive expertise in vehicle technology with hardware, software, and services to offer complete mobility solutions.

indra

Our solutions and services

Mova Consulting

We plan and design transport infrastructures

Mova Collect

We promote innovation in payment methods and business models

Mova Traffic

We build comprehensive traffic management and control solutions

Mova Protect

We guarantee maximum protection of businesses and people

Mova Experience

We accompany users on their journey and reinvent their experiences

Mova Comms

We connect the transportation ecosystem with personalized communication solutions

Mova Care

We build the mobility of the future, guaranteeing the best results in the present

THE ASK

A circular icon with a brown background. In the center, there is a white rectangular box with a torn edge effect containing the text "Camera Suppliers".

**Camera
Suppliers**

A circular icon with a light gray background. It features a central blue silhouette of a man in a suit and tie, with two fainter gray silhouettes of people behind him.

Advisers

A circular icon with a blue background. It depicts two hands shaking in a firm grip, with the hands colored in shades of orange and yellow. The hands are wearing gray cuffs.

Value Proposition

VISUAL ANALYTICS

- Auto-generation of reports for monitoring.
- Visualization of traffic data over various time scales

WEB APPLICATION

- Data center was created for a centralized reference
- Data center enables cross referencing of data acquired.
- Monitoring of live traffic feeds

ROAD TRAFFIC VIOALTION DETECTION

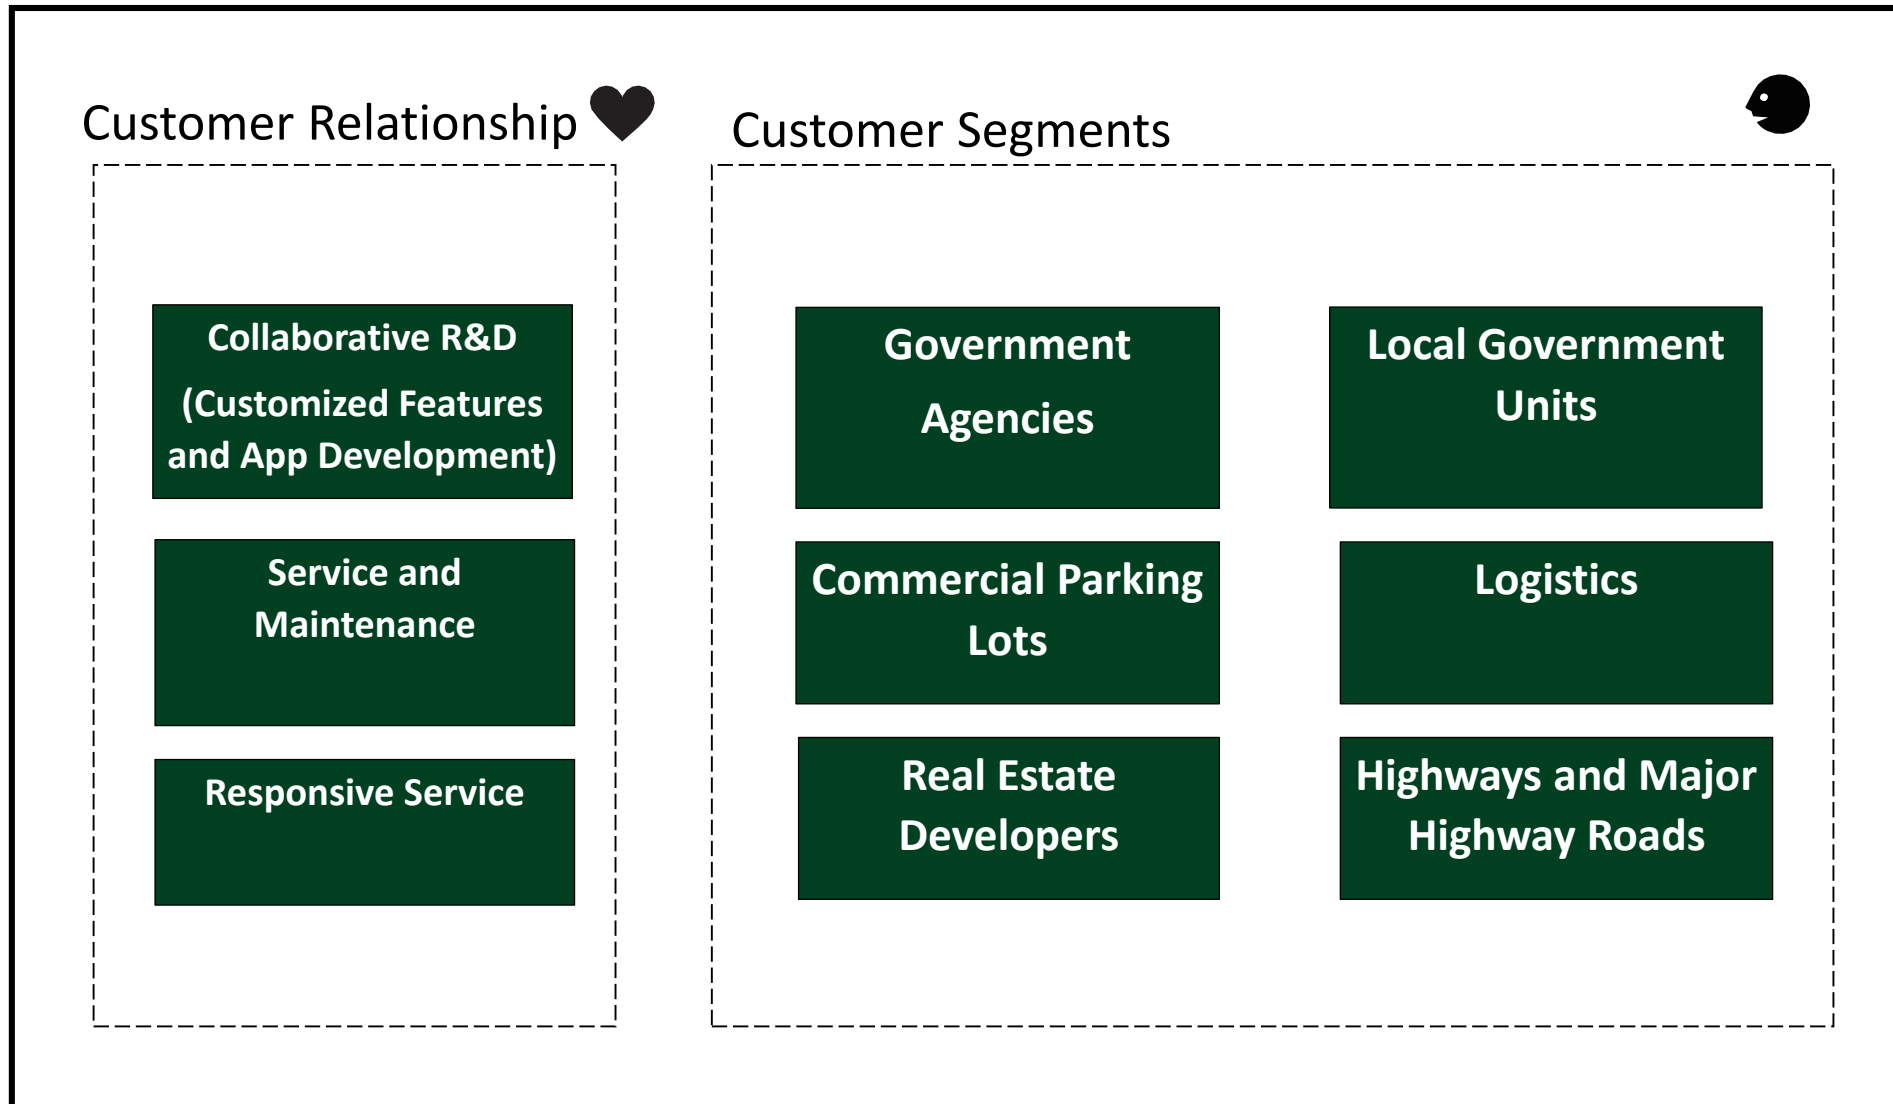

- Continuous monitoring and detection of road violations
- Computer vision extends the operators' field of vision.
- Encoding is a click away with the web app.
