EVIDA Law (2022)

Electric Vehicle Industry Development Act (EVIDA)

2022 - Republic Act (R.A.) No. 11697 or the Electric Vehicle Industry Development Act (EVIDA) lapsed into law.

EVIDA and the provisions outlined within it foresee a future wherein a transformative shift to electric vehicles will lead us to our independence from imported fossil fuel.

EVIDA provisions essential to EV adoption and intergration in the Public Transportation System:

- Institutionalizing fiscal and non-fiscal incentives for EVs
- Mandating the creation of a Comprehensive Roadmap for the Electric Vehicle Industry (CREVI) - an annual work plan that covers areas which are essential to the development of the electric vehicle industry.
- Invigorating the electric vehicle industry development ecosystem by mobilizing key national departments and their attached agencies as well as the Local Government Units

Objectives:

- Draw lessons from the business models of early adopters of Electric jeepneys/ E-jeepneys.
- Determine critical success factors and challenges to successful operations.

Case study approach:

- 4 entities (3 cooperatives, 1 corporation) from 3 cities that were early adopters of E-jeepneys [Referred to as C1,C2,C3,C4]

Entities interviewed:

| Entity Name | Location | Number of EV's with franchise | Convention |
|--|----------------------|-------------------------------|------------|
| Metro Gensan Transport Cooperative (MGTC) | General Santos City | 28 | C1 |
| Lagao Drivers Operators Transport Cooperative (LADOTRANSCO) | General Santos City | 41 | C2 |
| South Metro Transport Services Cooperative, Inc. (TSCI) | Metro Manila | 17 | C3 |
| United Drivers and Operators Transport Cooperative Transport Service Inc. (UDOTCO-TSI) | Lapu-lapu City, Cebu | 100 | C4 |

Operational characteristics

| | C1 | C2 | C3 | C4 |
|---------------------------|--------------|--------------|--------------------------|---------------------------|
| Round Trips per day | 10 | 6 | 8 | 5 |
| Route Length (Round Trip) | 15km | 24km | 11km | 24km |
| Number of Operating hours | 8 + Overtime | 8 + Overtime | 10–12 | 10–12 |
| Number of E-Jeepney Units | 28 | 41 | 17 but only 15 operating | 100 but only 40 operating |

Operational activities

| Factor | C1 | C2 | C3 | C4 |
|-------------------------------|---|---|--|--|
| Battery Management | Battery Swapping | Battery Swapping | Initially Battery Swapping, but currently overnight charging is sufficient | Fast Charging, about 2–3 hours charging at night/end of day for 12 hours use |
| Battery Technology | Cobalt + Lithium | Lithium | Initially Lead-Acid, then shifted to Lithium | Initially Lead-Acid, then shifted to Lithium |
| Dispatching | Manual, headways vary depending on peak and offpeak times | Manual, headways vary depending on peak and offpeak times | Manual, headways vary depending on peak and offpeak times | Manual + GPS based, headways vary depending on peak and offpeak times |
| Driver and Vehicle Monitoring | Random inspections, CCTVs | Random passenger manifests, CCTVs, and Passenger count auditors | None. Driver quota implemented. | CCTVs, random inspections, GPS installed inside batteries |
| Fare Collection | Manual fare collection | Combination of tap cards and cash | Cash payments (reverted from AFCS) | Cash payments (reverted from AFCS) |

Key Resources

| Factor | C1 | C2 | C3 | C4 |
|----------------------------------|--|--|---|---|
| Financing Strategy | In-house financing with manufacturer | Bank loan | In-house financing with manufacturer | Financing provided by the partner. |
| Government Assistance (Local) | Subsidy per unit from climate fund | Subsidy per unit from climate fund | None | Local govt. support for training and initial garage area |
| Government Assistance (National) | DOTr equity subsidy | DOTr equity subsidy | None | None |
| Capital Building | Mandatory daily and monthly member collections | Soft loans, grants, and monthly member contributions | Member contributions; grant applications | – |
| Battery Investment | Initially rented, then invested in spare batteries (thru service contracting earnings) | Initially rented, then invested in spare batteries (thru service contracting earnings) | Initially bought cheap Lead-Acid batteries, switched to leasing (monthly rental fee) customized batteries with included service and maintenance | Initially bought Lead-Acid batteries, switched to leasing (monthly rental fee) customized batteries with included service and maintenance |
| Charging Stations | Manually setup charging stations using included battery chargers | Manually setup charging stations using included battery chargers | Manually setup charging stations using included battery chargers | Manually setup charging stations using included battery chargers |

Revenues, Profit sharing, and Salaries

| Factor | C1 | C2 | C3 | C4 |
|--|--|--|--|---|
| Additional revenue streams | Terminal rental, fleet management fees | Terminal fees, advertising, other businesses | None | None |
| Operator/ Franchise holders Incentives | Monthly Compensation + Annual Dividends | Php 80k payment paid over 2 years, Monthly Compensation + Annual Dividends | Monthly Compensation + Annual Dividends | Monthly Compensation + Annual Dividends |
| Driver payment and Incentives | Salary + 40% of excess remittance as incentive | Salary + overtime pay (hourly) | No salary, 100% of excess of daily quota | Salary + overtime pay (hourly) |

Highlights of Business Models Observed

EURO-4 and Electric jeepneys in garage

Battery swapping station

- Some operate a mix of electric and Euro 4 units, **gradually** built up their fleet
- Set-up own battery swapping/ charging stations
- Financing mainly through member contributions + subsidies & loans
- **Thriving entities**: sole operator in route, has other revenue streams, experienced in running cooperatives
- **Struggling entities**: not sole operator in route, transport is the only revenue stream, relatively inexperienced

Analysis of Financial Performance.

Euro 4 vs EV

Case of C₁

Average Operating Expenses per Unit

(Euro IV vs EJeepney)

| | Average Expense Per Unit, in '000 | | % of Total Expense | |
|------------------------|-----------------------------------|---------|--------------------|---------|
| | Electric | EURO-IV | Electric | EURO-IV |
| Operations | 89.49 | 403.19 | 38% | 66% |
| Driver's Salary | 112.21 | 129.14 | 47% | 21% |
| Repair and Maintenance | 14.74 | 53.49 | 6% | 9% |
| Administra tion | 21.48 | 26.27 | 9% | 4% |
| Total | 237.92 | 612.09 | | |

Total expenses for EJeepney is significantly lower compared to Euro IV, with the highest disparity seen in operating costs.

Average Income per Unit (Euro IV vs EJeepney)

Euro IV units have higher gross income indicating that the riding public might have a preference towards Euro IV units. Possible reasons may be because of comfort due to aircon/ more frequent trips for Euro IV. However, in terms of net EJeepney is observed to be higher than Euro IV.

Participation in Service Contracting

- Operating 11 of Ejeepney units
- 15 units of Euro IV Jeepney units started second half of 2020

- Start of Service Contracting
- Added 15 of Ejeepney units in the first half of 2021, then another 15 in the second half of 2021
- Added 15 units of Euro IV Jeepney units started second half of 2021

- 41 units of Ejeepney units in operation
- 30 units of Euro IV units in operation

Transport and Non-Transport Revenue Sources

| Other Income Category | Percent Share |
|-----------------------------------|---------------|
| Gasoline Station | 30.77% |
| Rent Income | 13.59% |
| Management Fees | 10.52% |
| Oils, Lubricants, Repair Services | 10.34% |
| Misc | 8.15% |
| Incentives | 5.93% |
| Daily Dues | 5.89% |
| Advertising Income | 2.95% |
| Membership Dues | 2.35% |
| Insurance Commission Income | 2.32% |
| Solicitation | 1.47% |
| Terminal Income | 1.43% |
| Membership Fees | 1.30% |
| Penalties | 1.02% |
| Drivers Fund - Route 10 & 11 | 0.83% |
| Franchise Processing Fee | 0.66% |
| Fees and Certifications | 0.26% |
| Trading-Lado | 0.15% |
| Bank Interest | 0.05% |

Success Factors in E-jeepney operations:

1. Operators willing to try EVs due to attractive deals from manufacturers
 - Ex: Bulk discount; Alternative payment schemes (battery leasing, zero downpayment)

Success Factors in E-jeepney operations:

1. Operators willing to try EVs due to attractive deals from manufacturers
 - Ex: Bulk discount; Alternative payment schemes (battery leasing, zero downpayment)
2. Supportive local government

Tricycle competing with jeepney

Success Factors in E-jeepney operations:

1. Operators willing to try EVs due to attractive deals from manufacturers
 - Ex: Bulk discount; Alternative payment schemes (battery leasing, zero downpayment)
2. Supportive local government
3. **Gradual growth of vehicle fleet and EV infrastructure.**

(a) Charging of Batteries Inside C4's Garage

Success Factors in E-jeepney operations:

1. Operators willing to try EVs due to attractive deals from manufacturers
 - Ex: Bulk discount; Alternative payment schemes (battery leasing, zero downpayment)
2. Supportive local government
3. Gradual growth of vehicle fleet and EV infrastructure
4. **Alliance with other operators.**

Success Factors in E-jeepney operations:

1. Operators willing to try EVs due to attractive deals from manufacturers
 - Ex: Bulk discount; Alternative payment schemes (battery leasing, zero downpayment)
2. Supportive local government
3. Gradual growth of vehicle fleet and EV infrastructure
4. Alliance with other operators
5. **Non-transport revenue sources**

Cr's Non-Transport Revenue Distribution

| Other Income Sources | Percent Share |
|-----------------------------------|---------------|
| Gasoline Station | 30.77% |
| Rent | 13.59% |
| Management Fees | 10.52% |
| Oils, Lubricants, Repair Services | 10.34% |
| Misc | 8.15% |
| Incentives | 5.93% |
| Daily Dues | 5.89% |
| Advertising | 2.95% |
| Membership Dues | 2.35% |
| Insurance Commission | 2.32% |
| Solicitation | 1.47% |
| Terminal Fees | 1.43% |
| Membership Fees | 1.30% |
| Penalties | 1.02% |
| Drivers Fund - Routes 10 & 11 | 0.83% |
| Franchise Processing Fee | 0.66% |
| Fees and Certifications | 0.26% |
| Trading | 0.15% |
| Bank Interest | 0.05% |

Success Factors in E-jeepney operations:

1. Operators willing to try EVs due to attractive deals from manufacturers
 - Ex: Bulk discount; Alternative payment schemes (battery leasing, zero downpayment)
2. Supportive local government
3. Gradual growth of vehicle fleet and EV infrastructure.
4. Alliance with other operators.
5. Non-transport revenue sources
6. **Operational benefits of EV's**

E-jeepney vs Euro-4 Average Monthly Expense (C1 case)

| | Average Monthly Expense Per Unit, USD* 1 USD = 58.55 Philippine peso | | | |
|------------------------|---|-------------------|-----------------------------------|----------------------|
| | E-Jeepney | Euro 4 | Difference (Euro 4- E-Jeepney) | Euro 4/ E-Jeepney |
| Operations | \$ 157.90 | \$ 844.04 | \$ 686.14 | 5.3 |
| Driver's Salary | \$ 189.33 | \$ 220.95 | \$ 31.62 | 1.2 |
| Repair and Maintenance | \$ 26.00 | \$ 94.95 | \$ 68.95 | 3.7 |
| Administration | \$ 24.57 | \$ 31.19 | \$ 6.61 | 1.3 |
| Total | \$ 397.81 | \$ 1191.13 | \$ 793.32 | 3.0 |

Ongoing Challenges to EV Adoption/ Modernization

- 1. Lack of **local government support** (route planning, traffic management)
- 2. Many **support policies and infrastructure are not in place**, making operators revert to traditional operations to assure profits:

| Lack of.. | Lead to.. |
|---|---|
| Policy for dealing with competing modes | Financial losses, driver quota system |
| Infrastructure support for EV charging | Financial losses, curtailed expansion to bigger fleet |
| System for cashless payments | Driver fare pilferage |
| Realistic consolidation deadline | Unrealistic pay-offs to existing operators |

- 3. **Industry preparedness** for “modernized” operations: financial management, EV technology.

Concluding Remarks

- Not all operators are created equal: success depends on the right mix of people, politics, economics.
- Support systems need to be in place (infrastructure, workforce, institutions)
→ Modern vehicles, traditional operations.

Thank you for your attention.
